👤 Male

💍 Single

### PROFILE

Front end developer seeking roles to utilize my knowledge of UI development and responsive designing to create exceptional interfaces.

### PROJECTS

#### Weather API [↗](#)

- Made a simple weather website which tells the weather of the city or country you have entered.
- Made this using Fetch Api and JavaScript.
- There is also a feature of dynamic background change depends on day condition (rainy, mist or sunny).
- Project Link=<https://weatherfetchapi12.netlify.app/>

#### Iddo Dummy Website, PSD TO HTML RESPONSIVE DESIGN [↗](#)

- Made a responsive website, using techniques like HTML, CSS and Javascript
- Also used jQuery and many Javascript Libraries
- Project Link = <https://iddoresponsive.netlify.app/>

#### Card Validation [↗](#)

- To check that the card is valid or not.
- If it is valid it will also shows which card is it (Visa card , Master card , Debit card)
- Project Link=<https://cardvalidation1.netlify.app/>
